- Anticipated intelligent Speed Adaptation
- Driver Attention Warning (incl. driver monitoring camera) MHEV only
- High Beam Assist

E&EO October2026 | Model Year 26B C2. Images shown for illustrative purposes only.

09. POWERTRAINS: PERFORMANCE, FUEL ECONOMY & EMISSONS

ELECTRIC POWERTRAIN

Single-Speed Electronic Drive Selector

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the shifter lets the driver select from the following:

- Park
- Reverse
- Neutral
- Drive Braking (for increased regenerative braking)

Drive Mode Selector

The driver can determine the driving style by selecting one of the following modes:

- **Normal:** for a balanced drive that offers a compromise between performance and energy efficiency
- **Sport:** for a dynamic drive with a responsive throttle and the highest top speed and torque
- **ECO:** for maximum range and energy efficiency. The ECO mode deactivates all unnecessary energy-consuming features and reduces the top speed, torque and overall performance

Charging

New GRANDLAND Electricis fitted with a 11kW on board charger and is also equipped with a Mode 3 cable as standard. Additional charging accessories are available at extra cost. For more details please consult your local Retailer.

The charging flap's Padlock LED lights up when the cable is correctly plugged in and locked and then acts as a user interface to show the charging status via coloured LED lights:

- **White:** welcome light that helps to light up the area, especially useful in dark conditions · Flashing green: charging in progress
- **Solid green**: charging complete
- **Solid blue**: delayed charging toggled; changes to flashing green when charging commences · Solid red: malfunction

The driver Octoberalso choose from two settings:

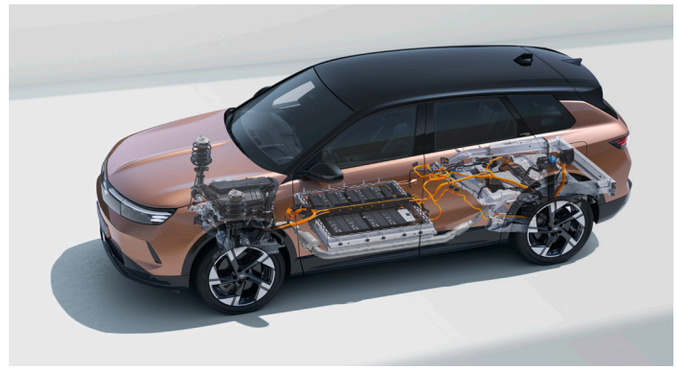

- **Immediate charging** (the standard setting): Starts charging as soon as the vehicle is docked for charging
- **Delayed charging:** This is especially useful for when cheaper electric rates are desired, e.g. charging at night. Simply enter a charging start time.

Please note, EV range assumes that vehicle has been pre-conditioned prior to journey. This function can be accessed either via MyOpel App or by using the infotainment system.

NEW OPEL GRANDLAND

DRIVETRAIN- ELECTRIC 73kwH	
CO2 EMISSIONS	0g/km
MAX POWER	213PS (157kw) @ 4370rpm
MAX TORQUE	345Nm (254lb.ft)
ACCELERATION 0-100KMH	9 Seconds
MAX SPEED	170kmh
TRANSMISSIONS	Automatic electric drive (fixed gear ratio)
KERB WEIGHT	2132kg
SERVICE INTERVAL	Initially after 1 year/12000km, then 20000km or 2 years
BATTERY CAPACITY	73Kwh
AC ON BOARD CHARGER	11Kw Triphase bi-direction
ENERGY CONSUMPTION	17 - 17.3kWh/ 100km
BATTERY WARRANTY	8 years/ 160,000km/ 70% capacity

CHARGING SUPPLY	SOCKET	CHARGE TIME (20-80%)
AC CURRENT- DOMESTIC 3 PIN SOCKET (2.3KW)	Type 2	22h 55min
AC CURRENT- HOME WALL-BOX OR PUBLIC CHARGING (7KW)	Type 2	6h 45min
AC CURRENT- PUBLIC CHARGING (11KW)	Type 2	4h 30min
DC CURRENT- PUBLIC RAPID CHARGER (160KW)	CCS	30m
RANGE	**73 KW**	
EV RANGE WLTP HIGH	520KM	

E&EO October2026 | Model Year 26B C2. *Fuel consumption figures are determined according to the WLTP test cycle. The fuel consumption you achieve under real life driving conditions and CO2 produced will depend upon a number of factors, including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Only compare fuel consumption and CO2 with other vehicles tested using the same technical procedures. For more information contact your local Opel Dealer.

PETROL HYBRID ENGINE

Transmissions

Hybrid e-DCT auto 1.2-litre petrol engine paired with a new six-speed dual clutch automatic transmission and a 28hp electric motor. Permanent magnet synchronous electric motor is integrated into the gearbox and produces peak power of 21kW (28hp) and maximum torque of 55Nm.

During deceleration from higher constant speeds, the petrol engine stops and the e-motor acts as a generator to recharge the hybrid system's 48v battery.

Under low torque requirements the e-motor allows short distances to be driven on electric power alone (e.g. when manoeuvring or under 8mph in city traffic). It also assists the petrol engine under acceleration, such as when driving from standstill.

Drive Mode Selector

The driver can determine the driving styles by selecting one of the following modes:

- **Normal:** for a balanced drive that offers a compromise between performance and energy efficiency
- **Sport**: for a dynamic drive with a responsive throttle and the highest top speed and torque
- **ECO:** for maximum range and energy efficiency.

Steering

Electrical power steering (EPS)

Brakes

Automatic emergency braking · In crash braking · Traction control · Anti-lock braking system (ABS) · Electronic stability programme

Fuel Tank Capacity

· 55 litres
